

Water Quality Credit Trading

In accordance with 62-302.700, Florida Administrative Code the Department shall track all credits generated or trades authorized in permits and shall post information about trades and available credits. The information below describes the trades that have taken place since October 2008 when the Basin Management Action Plan (BMAP) for the Lower St. Johns River Basin Main Stem was adopted by the Secretary of the Department. There are currently no other available credits permitted by the Department. However, should more trades take place, the Department will update this table. To learn more about our BMAP Program please visit <http://dep.state.fl.us/water/watersheds/bmap.htm>.

Seller	Buyer	Parameter	Amount Traded (kg/yr)	Cost for Trade
Town of Hastings Wastewater Treatment Plant (WWTP)	St. Johns County	Total Phosphorus (TP)	271	\$30,000/year
