

Clean Marine Retailer Action Plan Workbook

Before you begin this workbook take a moment to review the following definition to make sure your facility is eligible to participate in the program at this time. You qualify as a boatyard in the Clean Marina program if you are:

A **Marine Retailer in the Clean Marina Program is a facility that sells new or used boats and provides services. The marine retail facility is a facility that provides, onsite or offsite, repair or refinishing for hull, mechanical or electrical work on vessels as part of a service department. This work may entail the use of resin, gelcoats, paints, lubricants, solvents, or other hazardous materials and may require an air permit, industrial waste water permit, hazardous waste permit, or storm water permit for areas other than vehicular parking.**

The *Clean Marine Retailer Workbook* has two (2) sections. The first section is a review performed by the retail owner/operator of facility operations and activities performed by the owner/operator, through the use of a checklist provided by the Florida Department of Environmental Protection. The checklist includes service activities with associated *Best Management Practices (BMPs)*; efforts to communicate effectively the standards and procedures to all employees and agents; and, procedures for prompt and appropriate correction of any violations that may occur if corrective actions need to take place. Operations or activities that might not be present at your facility are marked (Optional) if activities are present, the category applies. Section 2 is a concise commitment statement by the boatyard describing steps which will be followed to achieve a Clean Marine Retailer Designation meeting program criteria grouped under Environmental Management, Water Quality and Services.

Forms in the workbook have been designed for you to indicate the dates criteria will be implemented and the approximate cost. This is intended to serve as an active planning tool for your use by treating each criterion as a task or goal to accomplish by dates you set.

This document must be retained before and after designation to serve as a record of your efforts to achieve designation and to keep your designation current. Good faith effort is demonstrated by active and continual progress in achieving the criteria of the program. **This will be especially important should your facility be inspected by regulatory agencies during your efforts to achieve designation.**

How To Complete the CMRAP

There are six (6) columns as part of the *Clean Marine Retailer Action Plan (CMRAP)*. The first states “If No, When”. This gives you the opportunity to set the date to accomplish the desired task. If you have completed the task, then leave this column blank. If you have not completed the desired task then set yourself a reasonable time frame. The next column is the expected cost. Once again this is only if you have not accomplished this task but desire to do so. These columns are to help you budget and plan for the desired results. As shown below in **red**.

EMERGENCIES

1. Written Emergency Action Plan or “Panic” File On Site
2. Staff Trained for Emergencies
3. Marine Retailer Prepared for Spill

	If No, When	Cost	Required Points	Total	Optional Points	Total
	11/99	0			10	
					10	
			10			
Total			10		20	

The 3rd column are “Required Points”. These are required points as shown for CMRAP Analysis (Page CMRAP 19). Generally these points indicate that they are part of *Best Management Practices* with Federal or State laws or rules. Once you have **accomplished** this task fill out the space to the right (as shown below in **red**). The optional points are listed in the 5th column. You place those points to the right or the 6th column (as shown below). You will need to 60% of **total** optional points achieved in order to receive designation by the DEPARTMENT. The bottom row of each column is the area where you will add up all points in each “Total” column.

EMERGENCIES

1. Emergency “Panic” File On Site
2. Staff Trained for Emergencies
3. Marine Retailer Prepared for Fuel Spill

	If No, When	Cost	Required Points	Total	Optional Points	Total
	11/99	0			10	10
					10	10
			10	10		
Total			10	10	20	20

Any questions in completing this form, call your DEP District Technical Staff (See page 145 of the manual) or call 850-245-2847

Clean Marine Retailer Action Plan

SECTION 1

EMERGENCIES

1. Emergency Action Plan or "Panic" File on site.
2. Staff trained for emergencies/spill.
3. Marine Retailer prepared for spill.

	If No, When	Cost	Required Points	Total	Optional Points	Total
					20	
					20	
			20			
Total			20		40	

HURRICANE PREPAREDNESS

1. A written, site specific Hurricane Preparedness Plan is in place.
2. Review hurricane procedures annually with staff.
3. Acquaint subcontractors with plan.

	If No, When	Cost	Required Points	Total	Optional Points	Total
			20			
					10	
					10	
Total			20		20	

FIRE SAFETY

1. Fire extinguishers clearly marked and readily available throughout yard.
2. Written Fire safety procedure on site or completed in "Panic File".
3. Keep all ingress and egress clear of obstacles in case of fire.

	If No, When	Cost	Required Points	Total	Optional Points	Total
					20	
					10	
					10	
Total					40	

FUELING (Optional Service)

1. Approved Spill Prevention Control and Countermeasures Plan prepared according to Rule 62N-16.033, F.A.C.
2. Facility has a Certificate of authorization #: _____
3. Personnel are supervising when customers are fueling.
4. Have customers avoid fuel discharges to the water by not allowing topping off.
5. Post signs for proper fueling.

If No, When	Cost	Required Points	Total	Optional Points	Total
		10			
		10			
				10*	
				10	
				10	
Total			20		30

Aboveground and underground storage tanks (AST/UST) are regulated by State Statutes Chapter 62-761, and 62-762 respectively, and are overseen by local county agencies. In addition to the State rules, the county agencies may have rules that are more stringent than the State’s rules.

STORAGE TANKS (Optional)

1. Storage tanks are registered with the State. Registration Number: _____
(Above ground >550 gallons and Underground < 110 gallons)
2. Facility with storage tanks in excess of ten thousand pounds of hazardous material, gas exceeding 1,500 gallons diesel exceeding 1,400 gallons, has filed EPCRA Tier II Reporting as of March 1st, of each year. *If N/A take 10 points.*
3. Registration placard properly displayed.

If No, When	Cost	Required Points	Total	Optional Points	Total
		130			
		10			
		10			
Total			150		

NOTE: If you have a facility where the storage tanks have been closed down, please see the “Petroleum Control” section behind the Resources tab in this manual.

**** If N/A skip these questions and take 10 “required” points***

**** Facilities eligible for a State funded program or with tank systems installed with secondary containment with no history of release do not have to perform closure assessment.**

SOLID WASTE

	If No, When	Cost	Required Points Total	Optional Points Total	Total
1. Properly manage and dispose of all solid wastes.			10		
2. Provide signage identifying waste disposal practices.				10	
a. Post sign by (near) dumpsters instructing patrons NOT to place hazardous waste in dumpster and directing them to boatyard or nearest hazardous waste collection site.				10	
b. Post sign by (near) dumpster instructing patrons not to place USED OIL , lead batteries, old gasoline, diesel IN dumpster and directing them to boatyard or nearest public used oil collection site.				10	
3. Train marine retail staff in proper waste management.				10	
4. Provide convenient trash disposal to marine retail patrons.				10	
5. Provide recycling facilities to marine retail patrons.				10	
6. Pick up litter at least twice a day.				10	
7. Organize or participate in shoreline cleanup along the surface body water at marine retail facility.				10	
8. Provide recognition to retail staff employees who properly dispose of litter.				10	
Total			10	90	

THIS SPACE INTENTIONALLY LEFT BLANK

LIQUID WASTE (Optional)	If No, When	Cost	Required Points	Total	Optional Points	Total
1. Waste storage containers and tanks are in adequately sized containment structure with a roof to keep rainwater from filling the impervious containment structure. Required for used oil.					10	
2. If no roof over secondary containment, any drain valves are kept closed and the facility has proper written protocol for removal of the industrial waste water from the structure.					10	
3. Provide adequate space for SQG container inspections.					10	
4. Liquid waste containment kept locked except when a facility employee is available to monitor waste segregation					10	
5. Educate staff and patrons with proper signage					10	
6. Train staff about proper management and disposal of all liquid waste and response to spills.					20	
7. Insert language in tennant/subcontractor agreement for proper liquid waste disposal					10	
8. Spill Contingency Plan for other than fuel.					10	
9. Spill control materials and empty containers available for clean up.					10	
10. All containers are are closed and clearly marked and labeled as to their contents.					10	
11. Signs posted that indicate wastes only be put in storage under the supervision of facility personnel.					10	
12. Inform repair contractors as to your marine retailer's management/disposal on liquid waste storage.					10	
Total					130	

If you generate between 220 and 2,200 pounds of hazardous waste each month you are a small quantity generator of hazardous waste (SQG) and you have additional management standards. The following questions will use the abbreviation SQG to distinguish between facilities that generates less than 220 pounds of hazardous waste a month and are conditionally exempt (CESQG) from full regulation. In order to determine your actual generation status, you must consider ALL hazardous wastes generated at your facility. Here is a list of typical hazardous wastes generated at boatyards:

- Flamable parts cleaning solvents (flash point less than 140 F)
- Flamable/toxic paint related solvents
- Paint chips (must determine whether these are toxic by testing or knowledge)
- Waste Antifreeze (need waste determination if not recycled on-site)
- Mercury containing bilge pump switches and fluorescent light bulbs
- Signal Flares that are past their useful shelf life
- Used Batteries (do not count these if they are recycled)
- Used fuel filters & waste gasoline (do not count these if they are recycled)

HAZARDOUS WASTE	If No, When	Cost	Required Points	Total	Optional Points	Total
1. Procedures in place for the proper management and disposal of hazardous wastes generated.			10			
2. Maintain records of hazardous waste recycling and disposal at the facility for a minimum of three (3) years.			10			
3. Facilities with storage tanks in excess of ten thousand pounds of hazardous materials (inc. gas & diesel) has filed EPCRA Tier II Reporting as of March 1st each year. <i>If N/A take 10 points</i>			10			
4. Use environmentally friendly products.					10	
5. Provide spill control material and empty container for clean up.					10	
6. Use snap top funnels that automatically close.					10	
7. Recycle solvents.					10	
8. Contract with an approved Hazardous Waste Disposal Site.			10			
9. Determined which waste streams are hazardous			10			
10. Determine quantity of hazardous waste generated.			10			
11. All containers clearly marked or labeled as to their contents.			10*			
12. Container marked with the appropriate accumulations start date if SQG.			10*			
13. Retailer has EPA ID number			10*			
14. Emergency phone numbers posted in all appropriate areas.			10*			
15. Appropriate facility personnel trained on proper hazardous waste management.			10*			
16. Designated Emergency Coordinator.			10*			
17. Segregate incompatible wastes.			10*			
18. Provide adequate aisle space for SQG container inspections.			10*			
19. Fire Department and Police are familiar with potential emergencies that may occur.			10*			
Boatyard operates to minimize the possibility of fire, explosions or non-sudden release of hazardous waste.			10*			
20. Marine retailer operates to minimize the possibility of fire, explosions or non-sudden release of hazardous waste.

* Required points if Small Quantity Generator

**ENGINE MAINTENANCE/REPAIR
(Optional)**

**If No, Required Optional
When Cost Points Total Points Total**

1. Engine repairs done inside over an impervious surface.				10	
2. Mechanics are trained to respond to accidental spills and other emergency situations.				10	
3. Emergency phone numbers posted by the telephone. * Required if Small Quantity Generator				10*	
4. Spill response equipment and absorbent materials are available. * Required if Small Quantity Generator				10*	
5. Parts cleaning units containing solvents are kept closed except during use.				10	
6. "NO SMOKING" signs posted near flammable products.		10			
7. Flammable parts cleaning solvent recycled: by tolling agreement with a recycling service/contractor or recycling on site.		10			
8. Corrosive carburetor cleaner properly managed /disposed of as hazardous waste. <i>If N/A give 10 points.</i>		10			
9. Solvent soaked and oily rags recycled by an industrial laundry service or disposed as hazardous waste.		10			
10. Records of hazardous waste recycling (waste antifreeze, spent parts washer, solvent soaked rags) and disposal maintained for 3 years.		10			
11. Metal shavings and scraps from metal working and grinding are recycled as scrap metal.		10			
12. Prevent engine maintenance/repair materials/waste from being poured down floor drains, sinks or outdoor stormdrains.		10			
Total		70		50	

BOAT CLEANING

1. Prohibit the use of cleansers that contain ammonia, petroleum distillates, sodium hypochlorite or chlorinated solvents.
2. Use cleaning methods that prevent the release of pollutants to surface waters.
3. Post signs or displays to promote proper boat cleaning methods.
4. Bilges are checked and contents disposed of properly before drain plug is pulled. If vessel has through-hull discharge, bilges are checked to ensure that no oily water or industrial wastewater will be discharged to surface waters.
5. Prohibit cleaning and scraping of hull bottoms, including barnacle scraping of running gear while vessels are in the water.
6. Use filtration in drains to remove visible solids and pollutants.

If No, Required Optional

PAINTING (Optional)

1. Marine Retailer employs best management practices to minimize or eliminate emissions to the environment.
2. Provide a labeled closed container for ignitable paint waste.
3. Prohibit spray painting during windy conditions which render containment ineffective.
4. Mix paints and solvents in designated area.
5. Have absorbents and other cleanup items readily available for immediate cleanup.
6. Allow empty paint cans to dry before disposal.
7. Keep paint and paint thinner away from traffic areas to avoid spills.
8. Recycle paint, paint thinner and solvents.
9. Employees trained on proper painting and spraying techniques.
10. Properly manage solvent paint waste as hazardous waste.
11. Store paint and solvents in fire proof cabinet (room).
12. Maintain records of hazardous waste disposal for a minimum of three years.
13. Provide a fire proof container for rags contaminated with solvents.
14. Solvent soaked rags are recycled by an industrial laundry service or disposed of as hazardous waste.
15. Solvents used for spray gun cleaning are directed into a container for disposal rather than directed into the air. The container is immediately closed and labeled, or the waste is immediately poured into a labeled paint waste container that will be closed.
16. Small quantity generator conducts and documents weekly container inspections
If N/A give 10 points
17. Marine Retailer has air permit.
If N/A take 20 points
18. Hazardous waste determination conducted for paint filters (potential to contain heavy metals) and proper disposal.
If N/A take 10 points.

PAINT REMOVAL (Optional)

1. Outdoor hull maintenance area has hard, impervious surface or uses tarps or other methods to collect paint.
2. Use dustless vacuum sanding or alternative mechanical or gel/paint peeling machine.
3. Perform paint removal indoors.
4. Cover drains, trenches and drainage channels to prevent entry of -sanding debris to the stormwater system.
5. Clearly designate hull scraping and sanding areas.
6. Clearly designate receptacles to receive sandings and paint chips.
7. Promptly contain spent abrasives for proper disposal.
8. Staff, subcontractors and do-it-yourselfers are required to clean up their work areas after they perform hull maintenance.
9. Periodically sweep impervious surfaces on a routine, scheduled basis.

SANDBLASTING (Optional)

1. Train staff, subcontractors and do-it-yourselfers to use appropriate method to remove paint.
2. When sandblasting, use “reasonable and adequate” measures to contain and sandblasting waste.
If N/A give 10 points.
3. Cover drains, trenches and drainage channels to prevent entry of blasting debris to the stormwater system.
4. All waste from blasting or sanding over water is captured and contained for proper disposal.
5. Clearly designate sandblasting area
6. Clearly designate receptacles to receive sandblasting waste.
7. Staff, subcontractors and do-it-yourselfers are required to clean up their work areas after they perform hull maintenance.
8. Periodically sweep impervious surfaces on a routine, scheduled basis.

PRESSURE WASHING (New)

1. If facility has a closed loop pressure-washing system, facility has contacted their District DEP Clean Marina staff to determine if a "Permit to Operate A Non-Discharging/Closed Loop Recycle System" is required. If no permit is required facility shows compliance with proper good maintenance habits by maintaining records of proper filter and sludge disposal from pressure-washing activities by a licensed, industrial waste hauler. *If N/A take 20 points.*
2. If facility has filtration, chemical treatment discharge to sewer system, facility has obtained permission and shows compliance with pretreatment standards, if any, of the public/private owned treatment works (POTW). *If N/A take 20 points.*
3. If facility discharges to surface water, facility shows compliance with regulations under Chapter 62-620, f.A.C., and has obtained a State of Florida, Industrial Wastewater Facility Permit. *If N/A take 20 points.*
4. If facility has ground water discharges, facility has shown compliance with regulations under Chapter 62-522, F.A.C., and Chapter 62-520, F.A.C., and has obtained Permit to Discharge Process Wastewater From New or Existing Industrial Wastewater Facility to Ground Water, or has letter of exemption. *If N/A take 20 points.*
5. Facility has designated pressure-washing area.
6. Facility's pressure-washing area implements berms and/or sloped pads to contain foulants and visible industrial water.

Extra Credit

My marine retail facility provides the following service(s) **not included** in the *checklist*. I request that the review team recommends additional points be awarded to my marine retail facility for the following innovative service that protects water quality:

Explanation of service provided

Use additional sheets as needed. If possible, please provide an image to be used in future publications of this Boatyard Best Management Practice(s).

Clean Marine Retailer Action Plan

SECTION 2

Marine Retail Name (please print)

For each of the criteria listed below in this section answer the question based on the operations of the marine retail facility in effect at the time this worksheet is being completed to achieve designation all criteria must be met.

Environmental Management

- A. Compliance with environmental and submerged land lease regulations, and using Best Management Practices as determined from the self-assessment checklist and designation review.

YES	NO	If NO, then implement all applicable measures as determined from completing the self-assessment checklist for Compliance and Best Management Practices in Section I . Indicate when all applicable measures will be accomplished and total cost to implement. When complete note the date.
-----	----	----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

_____	\$ _____	_____
When	Cost	Completed

- B. Available resource person at the marine retail facility who provides customers with environmental information, and who can be contacted for inquires about the Clean Marina Program and environmental issues pertinent to the marine retail facility.

YES	NO	If NO, then designate someone who will provide customers with environmental information and information about the Clean Marina Program. Indicate when this will be accomplished and cost to implement. When completed note the date.
-----	----	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

_____	\$ _____	_____
When	Cost	Completed

- C. Adequate and well-managed trash/garbage containers.

YES	NO	If NO, provide trash/garbage containers every 50 to 75 feet, keep empty and managed for cleanliness. Indicate when this will be accomplished and cost to implement. When completed note the date.
-----	----	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

_____	\$ _____	_____
When	Cost	Completed

D. Post for viewing, or otherwise publish, a set of environmental policies used by the marine retailer.

YES	NO	If NO, provide marine retailer environmental policies on a display board at the busiest point or points of the facility. Indicate when this will be accomplished and cost to implement. When completed note the date.
_____	\$ _____	_____
When	Cost	Completed

Boatyard Environmental Quality

A. Water and land of the marine retail facility must be clean without signs of oil, sewage or litter.

YES	NO	If NO, clean up the water and land. This may require a no discharge of sewage policy, check boats for bilge contamination, and regular policing of the area for litter. Indicate when this will be accomplished and cost to implement. When completed note the date.
_____	\$ _____	_____
When	Cost	Completed

Services

A. Docks and grounds are well maintained for safety and appearance.

YES NO If NO, clean up dock areas, keep free from clutter, uncoiled ropes, hoses and electric lines, repair dock planking at first signs of wear or deterioration. Indicate when this will be accomplished and cost to implement. When completed note the date.

_____ \$ _____ _____
When Cost Completed

B. All boatyard personnel are regularly trained on the facility's environmental policies and procedures.

YES NO If NO, set up regular training sessions with personnel on the marine retailer's environmental policies and procedures with emphasis on what to do in the event of emergencies. Training sessions should be frequent enough to keep everybody thoroughly familiar with the policies. Indicate when this will be accomplished and cost to implement. When completed note the date.

_____ \$ _____ _____
When Cost Completed

If you have answered YES to all of the above, **CONGRATULATIONS!** You are now eligible for Designation as a Clean Marine Retailer. Contact the Department of Environmental Protection District Office nearest you for a Designation Review of your facility. Once they have completed the review and confirm the facility's eligibility, the facility will be recommended for Designation.

If you have one or more NO responses, it is all right. This will be your opportunity to address the item or items that were discovered from your assessment. You will want to use this Clean Marine Retailer Action Plan form to assist you in developing and achieving the action steps that will result in a Clean Marine Retailer Designation for your facility.

CERTIFICATION CLEAN MARINE RETAILER ACTION PLAN

IN ORDER FOR THE MARINE RETAILER TO BE RECOGNIZED AS ACTIVELY PARTICIPATING IN THE CLEAN MARINA PROGRAM A COMPLETED CERTIFICATION FORM MUST BE SUBMITTED AND RECEIVED BY THE FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION. SEND THIS FORM COMPLETED AND SIGNED TO:

**FLORIDA DEPARTMENT OF ENVIRONMENTAL PROTECTION
CLEAN MARINA PROGRAM, MS 665
3900 COMMONWEALTH BOULEVARD
TALLAHASSEE, FLORIDA 32399-3000**

This is to certify that a self-assessment has been completed for _____
(Facility Name)

located at _____ and, for those items requiring
(Facility Address)

action, a Clean Marine Retailer Action Plan has been developed and is being implemented. It is further certified that all reasonable efforts will be made to achieve a Clean Marine Retailer Designation for the facility by _____ which is within the next eighteen months.
