RE: Authorization for Solid Waste Staging and/or Processing Area
Deepwater Horizon Oil Spill

Dear Mr. Dolihite:

The Emergency Final Order OGC No. 10-1610 (Order) that was executed on May 12, 2010, allowed the Department of Environmental Protection (Department) to issue field authorizations for staging areas to be used for temporary storage and processing of oil spill-generated debris resulting from the Deepwater Horizon Oil Spill. The Order also gives the Department authority to include specific conditions in the field authorizations for the operation and closure of a staging area that may include a required closure date extending beyond the expiration of the Order. Those portions of the Order allowing field authorizations for staging areas will expire on January 15, 2011. In order for oil spill-generated debris to continue to be stored at your facility, a written extension of the authorization must be provided by the Department. This letter serves as the written extension of the authorization to operate a staging area at the following location:

WACS ID: 10147 Latitude: 30° 26' 5.2439" Longitude: 86° 40' 16.0"
Site Name: Okaloosa County Transfer Station
Location/address: 630 Transit Way
Location/city: Fort Walton Beach, Florida 32547

Primary contact: Brian Dolihite
Phone number: 850-259-4156 E-mail address: bdolihite@wm.com

The use of this staging area is authorized subject to the same conditions listed in the Department's June 10, 2010, authorization letter (enclosed) and will expire on June 15, 2011, unless further extended in writing by the Department.

If you have any questions or comments on this authorization letter, please feel free to contact Ross Mitchell by e-mail at ross.mitchell@dep.state.fl.us or by phone at 850-595-0623.

Sincerely,

Michael S. Kennedy, D.G.

RE: Authorization for Solid Waste Staging and/or Processing Area
Deepwater Horizon Oil Spill

Dear Mr. Dolihite:

In accordance with Emergency Final Order OGC No. 10-1610 (Order) that was executed on May 12, 2010, the Department may issue field authorizations for staging areas to be used for temporary storage and processing of oil spill-generated debris resulting from the Deepwater Horizon Oil Spill. The Order also gives the Department authority to include specific conditions in the field authorizations for the operation and closure of a staging area that may include a required closure date extending beyond the expiration of the Order. A copy of this Order may be obtained from the Department's website at the following address:

http://www.dep.state.fl.us/deepwaterhorizon/files/authorizations/051210_emergency_final_order.pdf

The Department has evaluated your request for a field authorization of a staging area at the following location:

WACS ID: 10147	Latitude: 30° 26' 5.2439" Longitude: 86° 40' 16.0"
Site Name:	Okaloosa County Transfer Station
Location/address:	630 Transit Way
Location/city:	Fort Walton Beach, Florida 32547
Primary contact:	Brian Dolihite
Phone number:	850-259-4156
Email address:	bdolihite@wm.com

"More Protection, Less Process"

The type of activities generally expected to be conducted for oil spill debris management at this site include (check all that apply):

- Waste rolloff container staging and/or transfer to disposal facility
- Decontamination activities for managing the oil spill debris
- Satellite accumulation area, meaning an area where oil spill debris is initially containerized near the cleanup area [if only this box is checked, please refer to specific condition 9]
- Other (describe): _____

The use of this staging area is authorized subject to the following specific conditions:

1. The staging area(s) shall be operated in accordance with the requirements of the Order, as well as any plans submitted as part of the request for field authorization.
2. In addition to the requirements of the Order, the oil spill debris must be collected, managed, processed and disposed of in accordance with the plans approved by the Unified Incident Command for incident MC 252, as appropriate. This includes documents such as the Waste Management/Disposal Plan and the Decontamination Plan.
3. All reasonable steps must be taken to minimize the release of contaminants from the oil spill debris into the environment. If contaminants are released into the environment, you must take immediate steps to contain the release and notify the Department within 24 hours.
4. The Department must be notified in writing when the staging area is opened and begins accepting debris, and when it is closed and stops accepting debris.
5. Access must be controlled to prevent unauthorized dumping and scavenging.
6. Unless otherwise approved by the Department in response to a written request from you, the staging area must cease operation, and all oil spill debris and related equipment must be removed from the site, by the expiration date of the Order. If the Order is extended, this authorization is automatically extended as well.
7. Impervious surfaces that are created or altered to establish any staging areas must be designed, constructed, operated, and maintained in a manner that minimizes offsite discharge of contaminated runoff, and so as to not cause adverse water quantity impacts or flooding to on-site or off-site property and receiving waters. If any impervious surfaces must remain for more than six months, the entity operating the staging area must apply to the Department for a permit (or permit modification) under Part IV of Chapter 373, F.S., for stormwater (quantity and quality) review and authorization, which may require further alteration of the system to meet requirements of the applicable Department surface water regulations for the area.
8. The staging area is limited to managing oil spill debris, and any putrescible or other unauthorized waste received at the facility must be removed within 48 hours.
9. Satellite accumulation areas are not required to obtain field authorizations prior to operation. However, in order to foster improved communications and accountability, field authorizations may be issued for such areas upon request. The Department may not have received written documentation demonstrating compliance with this condition of the authorization, and may not have evaluated in detail any questions of land ownership or applicability of local regulations associated with satellite accumulation areas. Issuance of this authorization is not intended to create or interfere with any private property rights.

This authorization does not preclude the need to obtain any additional authorizations that may be required by the Order which includes but is not limited to the Department's Division of Air Resource Management, as well as the Department's Coastal Construction Control Line, Joint Coastal, and Submerged Lands and Environmental Resource Permitting programs.

Failure to comply with the conditions of the field authorization, or failure to adequately close a site by the required closure date, may result in enforcement action by the Department.

If you have any questions or comments on this authorization letter, please feel free to contact Ross Mitchell by e-mail at ross.mitchell@dep.state.fl.us or by phone at 850-595-8360, extension 1244. In order to provide better service to you, the Department is using electronic documents as much as possible. Please provide your e-mail address when replying.

Sincerely,

Michael S. Kennedy, P.G.
