Conditions at FLES1-017

Survey Summary:

Today FDEP personnel conducted a post-response monitoring survey in Escambia County Divisions 1, segments FLES1-017 and FLES1-021. The conditions in the Gulf of Mexico were ideal for survey of the swash zone, ITZ and the STZ today. Conditions were calm in the swash zone today due to light winds and very little wave action. The survey was conducted to verify the presence of BP MC-252 oil and not to mitigate all observed oil.

During this morning's survey there were many SRBs throughout the swash zone and the ITZ in both segments. A majority of the SRBs were found stranded in the ITZ and the STZ. An estimated 70 percent of the visible SRBs were able to be mitigated by FDEP personnel. There were many SRBs seen washing back and forth in the swash zone this morning, however none were mitigated.

There were 89 SRBs and 1.20 lbs. of BP MC-252 material removed from the beach today by FDEP personnel.
