### C Project Description

*Please provide more information about the proposed project. (Limit 2,750 characters.)*

There are many fish and shellfish products from which Gulf County residents make their living and put food on their tables. These species and their availability also bring thousands of tourists to Gulf County, and we rely heavily on our tourism trade. Scallops, shrimp, flounder, redfish, trout, and blue crabs are just a few examples. The Deepwater Horizon Oil Spill made people fear consuming seafood from this area.

This proposal is to monitor various species for safety and restoration purposes and to conduct human health studies to ensure there are no detrimental affects related to consumption of our seafood. This will include dissemination of public health information.
