C Project Description

Please provide more information about the proposed project. (Limit 2,750 characters.)

Gulf County has approximately 70 miles of coastal property (from the Bay County line at Beacon Hill to the Franklin County line at Indian Pass). These beaches have been negatively impacted by the Deepwater Horizon Oil Spill response efforts of locating and removing tar balls and other oil products. Gulf County spent over \$22,000,00 in 2005 (through grants and taxpayers MSTUs) to nourish a portion of these beaches.

The proposed project would allow for testing/boring of approximately 36 miles of the existing coastline, removal of sand that may be contaminated with oil product, and re-nourishment of these beaches. It would also include surveying and testing the offshore borrow sites to ensure that environmentally safe material is placed on our beaches.
