

Natural Resource Damage Assessment (NRDA)

Restoration Project Information Sheet

A General Information

Organization Okaloosa County			
Contact Name (First Last) John Hofstad		Title Public Works Director	
Address 1759 S. Ferdon Blvd.		City Crestview	State FL
Phone Number (850) 423-4826 ext.		Email jhofstad@co.okaloosa.fl.us	
Organization Website www.co.okaloosa.fl.us			

B Project Information

Project Name Lake Lorraine Estates Stormwater Retrofit			
Location (e.g. John Smith National Wildlife Refuge) Lake Lorraine Estates is located in the Town of Shalimar in south Okaloosa County			
State(s) (Use 2-letter abbreviations separated by commas) FL	County/Parish Okaloosa	Watershed/Basin Choctawhatchee Bay	
Latitude (decimal degrees)	Longitude (decimal degrees)	Project Size (Choose one) miles 50 acres tons	Affected Area 50 acres

C Project Description

Please provide more information about the proposed project. (Limit 2,750 characters.)

Currently the stormwater system in Lake Lorraine Estates is failing. These failures mainly involve the deterioration of pipes. Pipes that separate and rust through allow soil, pollutants, and debris to enter the stormwater system. Stormwater exiting these outfalls carry harmful pollutants including: nitrogen, phosphorous, hydrocarbons, floating and suspended debris, and sediments. These constituents accelerate the degradation of Lake Lorraine and Choctawhatchee Bay, thereby threatening the recreational and economic use of the resource.

If funding is obtained, the County intends to install new piping to stop the system from further polluting Lake Lorraine and Choctawhatchee Bay and prevent these pollutants from entering receiving waters. The County intends to install new stormwater pipes throughout the entire Lake Lorraine Estates Sub-division to reduce continued pollutant loading. The County has easements in place which are sufficient to allow installation of the proposed infrastructure.

A typical purchase price for smooth wall plastic pipe is approximately \$120 per foot. With an estimated 1800 feet of pipe to be replaced, including sod, asphalt, and grout, the estimated materials cost will be \$235,500. Staff estimates that the cost of the program including engineering, design, permitting, and construction will be approximately \$500,000.

The County's current stormwater Capital Improvement Plan budget allocation for projects is approximately \$500,000 annually, a portion of which could be dedicated to this project along with in-kind services for some of the design work, permitting, and construction. If approved for funding, the project will be included in the County's 5-year CIP with 100% of the project completed the first year. The funding request is for \$500,000. This is sufficient to cover engineering, design, permitting, construction, and contingency.
