

# Natural Resource Damage Assessment (NRDA)

## Restoration Project Information Sheet

### A General Information

Organization Okaloosa County			
Contact Name (First Last) John Hofstad		Title Public Works Director	
Address 1759 S. Ferdon Blvd.		City Crestview	State FL
Phone Number (850) 423-4826 ext.		Email jhofstad@co.okaloosa.fl.us	
Organization Website www.co.okaloosa.fl.us			

### B Project Information

Project Name Okaloosa Island Shoreline Protection and Boardwalk			
Location (e.g. John Smith National Wildlife Refuge) Okaloosa Island property east of Marler Park			
State(s) (Use 2-letter abbreviations separated by commas) FL	County/Parish Okaloosa	Watershed/Basin Choctawhatchee Bay	
Latitude (decimal degrees) 30° 23' 51.75"	Longitude (decimal degrees) 86° 35' 35.3"	Project Size (Choose one) 0.25 miles	Affected Area 35 acres

### C Project Description

Please provide more information about the proposed project. (Limit 2,750 characters.)

Okaloosa County owns various tracts of land on a Gulf-front barrier island known as Okaloosa Island. Much of the island is undeveloped, undisturbed land controlled by Eglin Air Force Base, while the remainder is comprised of single and multi-family residential with a mixture of commercial properties. One large tract remains which is owned by the County and commonly referred to as the old Island Golf Center property.

The old Island Golf Center property is a contiguous tract approximately 35 acres in size. A portion of the property, approximately 6.3 acres, is leased to outside entities for commercial and non-profit use. The remaining acreage is a mixture of open "green" space, pine/oak hammock and coastal dune ponds. Since the departure of the previous tenant, par-3 golf course, the property has sat idle with only minimal landscape maintenance provided by the County's Public Works Department.

The northern boundary of the property fronts Choctawhatchee Bay along the southwest corner of the Bay. This shoreline is approximately 1300 feet in length and is not currently hardened against erosion from wave and tidal action. The County desires to develop the property for passive use and enjoyment of the existing natural resources. The existing dune system, hammocks and inland ponds shall remain in their native state, while the relatively flat southerly portion of the property will likely be developed to accommodate picnic areas, wildlife viewing stations, playground space and an outdoor amphitheater.

The NRDA project planned for this property includes the installation of a shoreline retaining wall along the 1300' of Bay frontage with an attached 10' wide boardwalk. The intent is to safeguard the property against further erosion, while providing the visiting public with pedestrian access along the waterfront for recreation and wildlife viewing. The estimated construction cost for this project is approximately \$500,000.00.
