

FLORIDA DEEPWATER HORIZON RESPONSE WEEKLY UPDATE

June 13, 2012

Gulf Coast Incident Management Team/Florida Branch

- Gulf Coast Incident Management Team (GCIMT) remains active in New Orleans with the Florida Branch Office located in Mary Esther, FL.
- Supporting the GCIMT is Darryl Boudreau (FDEP), State On-Scene Coordinator (SOSC), and George Henderson (FWC), State Scientific Support Coordinator (SSC). Darryl and George both staffed the GCIMT office this week.
- Representatives from the U.S. Coast Guard (USCG), FDEP and BP are staffing the Florida Branch Office.
- The Florida Branch, is supervising the activities of two Divisions, staffed by BP and their contract personnel with USCG oversight:
 - Division 1 - Western Escambia County (Perdido Key)
 - Division 2 - Eastern Escambia (Pensacola Beach), Santa Rosa, Okaloosa and Walton Counties.

Florida Activities

- A weekly FL command conference call for response activities is held every Wednesday at 0830 CDT. This call includes personnel supporting the GCIMT, FL Branch (FDEP, USCG, & BP Branch Director) and Department of Emergency Management (DEM).
- Three Shoreline Cleanup Assessment Technique (SCAT) teams, that include FDEP personnel, continue to conduct scientific assessments of the FL coast on a daily basis. Teams document oil found and provide cleanup recommendations.
- Product continues to be collected, documented and weighed by segment on a daily basis.

| Weekly Totals (Lbs) | | | | | | | |
|---------------------|-------------------------|----------|--------|-------|------|----------|-----------|
| Counties | Escambia/ Santa Rosa | Okaloosa | Walton | Bay | Gulf | Franklin | Total |
| Material Collected | 166.2 | 0.80 | 4.90 | 0 | 0 | 0 | 171.90 |
| Oiled Debris | 0.125 | 0 | 0 | 0 | 0 | 0 | 0.125 |
| Total- to date | 2,816,858 | 39,878 | 15,734 | 4,019 | 329 | 138 | 2,876,956 |

*Material collected totals represent work completed through these dates 6.07.12 - 6.13.12 - Note Bay, Gulf, and Franklin Counties are out of active response.

Florida Activities continued

- The State, BP and the USCG held a meeting on June 7th regarding conducting SCAT surveys during optimal conditions, i.e. outside of any weather/environmental constraints that would not allow for a thorough inspection. Captain Walker, FOOSC, agreed with the State that surveys should be conducted on days when the team feels the beach can be adequately surveyed and gave the directive that all SCAT team members are equally weighted and that if one team member does not feel a thorough survey can be conducted, the survey will be rescheduled to another day. Formal guidance will be drafted from the outcome of the meeting.
- On June 9th and 10th the AOR, especially Escambia County, received extremely heavy rainfall from localized storms. OPS teams conducted reconnaissance surveys on June 10th to check for storm impacts, damage to infrastructure and potential access issues. Due to flooding and beach erosion, crews were unable to work in Perdido Key State Park and Gulf Islands National Seashore, Fort Pickens until June 13th.
- STR-FL-4-007d, which covers Gulf Islands National Seashore, Perdido Key SCAT segments, was approved on June 13th. The revised STR includes language that allows targeted subsurface delineation and recovery upon approval from the National Park Service (NPS).
- SCAT team 6 will be temporarily stood down effective June 15th. The team will have the capability to stand back up to assist as needed. The reduction in the numbers of teams needed is due to a decreased amount of segments currently in the SCCP SCAT process. Additional Snorkel SCAT teams will be brought into Florida within the next month to continue nearshore investigations.
- The State approved the following document(s)/ plan(s):
 - Shoreline Inspection Report (SIR-(1)) - for segments FLOK2-030 and 033; FLWA1-028; and FLWA2-031. These segments met shoreline cleanup criteria and in accordance with the SCCP will be transferred into SCAT monitoring for a minimum of 30 days prior to conducting a second SIR (SIR-(2)).
 - Shoreline Inspection Report (SIR-(2)) - for segments FLOK2-027; FLWA1-005, 016, 019; FLWA2-005, 028, 029 and 033. These segments met shoreline cleanup criteria and will be removed from the response.
