HEALTH ADVISORY

Friday, May 11, 2007.

Smoke from brush fires in the surrounding counties is blanketing much of the area. This has caused poor air quality conditions. The Department is issuing this HEALTH ADVISORY today and throughout the weekend for those areas impacted by the smoke.

Caution Statement: The elderly, children, and those with respiratory diseases including asthma or heart disease should avoid prolonged outdoor activity; everyone else should limit prolonged outdoor activity.

In addition to the precautions above, seek medical advice from a qualified health professional if you are experiencing problems relating to air quality.

For additional air quality information, please visit the following website:
