

Florida Park Service Resource Management Annual Report

Fiscal Year 2005-2006

FLORIDA PARK SERVICE RESOURCE MANAGEMENT ANNUAL REPORT

July 2005 – June 2006

Prepared by:
Bureau of Natural and Cultural Resources
3900 Commonwealth Boulevard
Tallahassee, Florida 32399-3000
(850) 245-3104

CONTENTS:

Executive Summary
Prescribed Burn Report
Wildfire Summary
Exotic Plant Removal Report
Nuisance and Exotic Animal Removal Report
Marine Turtle Nesting Report

Executive Summary

2005-2006 Resource Management Annual Report

This report summarizes data on four major natural resource management activities during Fiscal Year 2005-2006 in Florida State Parks. More detailed information may be found in the data tables which follow.

Prescribed Burning and Wildfires

- Out of 311,753 acres of fire-type community, 181,836 acres were ecologically in need of fire
- 66% of the acres in need of fire were backlogged (i.e., beyond their interfire-interval)
- 38,764 acres were actually burned, reducing the backlog by 18%
- 54% of parks with identified needs conducted prescribed burns
- 40 wildfires accounted for 3,490 (9%) of the total acres burned
- 15 parks used mechanical treatment for fuel reduction/habitat improvement on 1,676 acres

Exotic Plant Removal

- 4,954 acres were treated in 111 parks by park staff
- 10,355 acres were treated in 15 parks by DEP/Invasive Plant Management contractors
- 173 species were treated
- Melaleuca removal was reported from District 3 for only the second time since 1994
- Brazilian pepper removal was reported in NE Florida for the first time (Ft. Clinch)
- For the first time more parks removed Chinese tallowtree than Australian pine
- Five of the top ten most commonly removed species are present in all five districts

Nuisance and Exotic Animal Removal

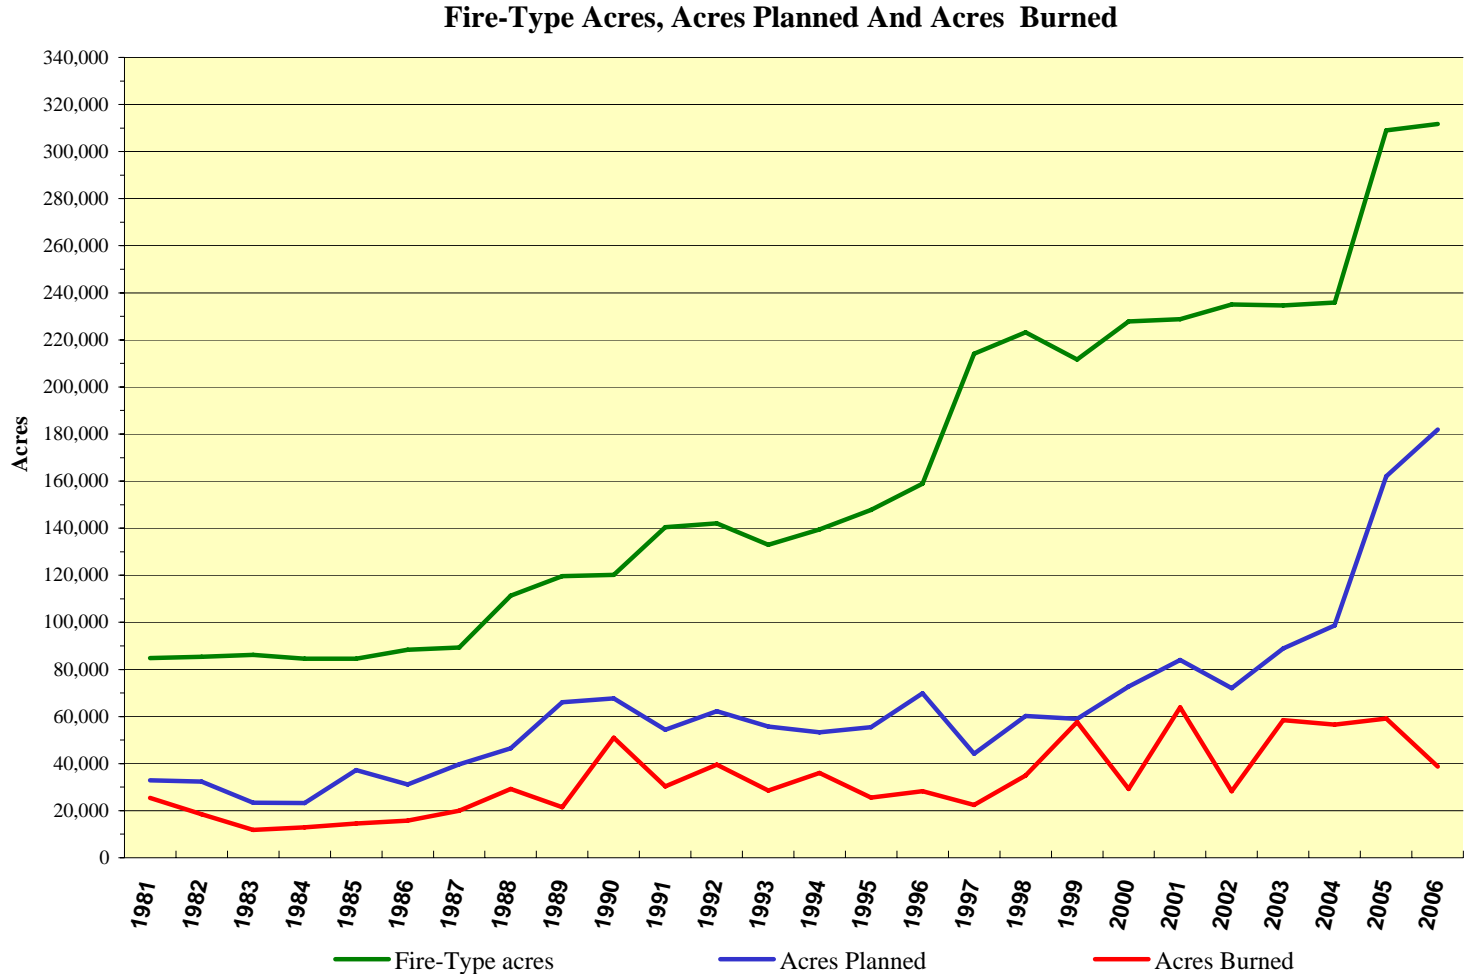

- 2,243 feral hogs were removed from 30 parks
- 759 exotic catfish were removed from Wekiwa Springs State Park
- 210 nuisance raccoons were removed from 11 parks
- 111 iguanas were removed from three parks in District 5
- 106 feral cats were removed from 17 parks

Marine Turtle Nesting

- This report contains Calendar Year 2005 and 2006 data
- Five species were present - hawksbill, loggerhead, green, leatherback and Kemps ridley
- Roughly 105 miles of state park beaches are surveyed each year
- Nesting was adversely affected by hurricane impacts of 2004 and 2005

Florida State Parks Prescribed Burning History 1981-2006

Year	Fire-Type Acres	Acres Planned	¹ Acres Burned
1981	84,805	32,881	25,442
1982	85,338	32,312	18,466
1983	86,135	23,389	11,876
1984	84,511	23,248	12,873
1985	84,614	37,281	14,609
1986	88,405	31,103	15,733
1987	89,308	39,691	20,010
1988	111,407	46,436	29,233
1989	119,653	66,101	21,470
1990	120,243	67,768	50,937
1991	140,369	54,353	30,258
1992	142,108	62,308	39,548
1993	132,976	55,685	28,516
1994	139,525	53,230	36,068
1995	147,752	55,464	25,616
1996	158,960	69,931	28,272
² 1997	214,176	44,129	22,376
1998	223,200	60,178	34,931
1999	211,686	59,033	57,650
2000	227,797	72,757	29,168
³ 2001	228,796	83,971	63,952
2002	235,040	72,103	28,337
⁴ 2003	234,681	88,920	58,510
2004	235,833	98,655	56,488
⁵ 2005	308,999	162,077	59,095
2006	311,753	181,836	38,764
	1,674,840	858,198	

¹ Acres burned includes prescribed fire and wildfire acres

² 1997-June 1997; prior years were January-December.

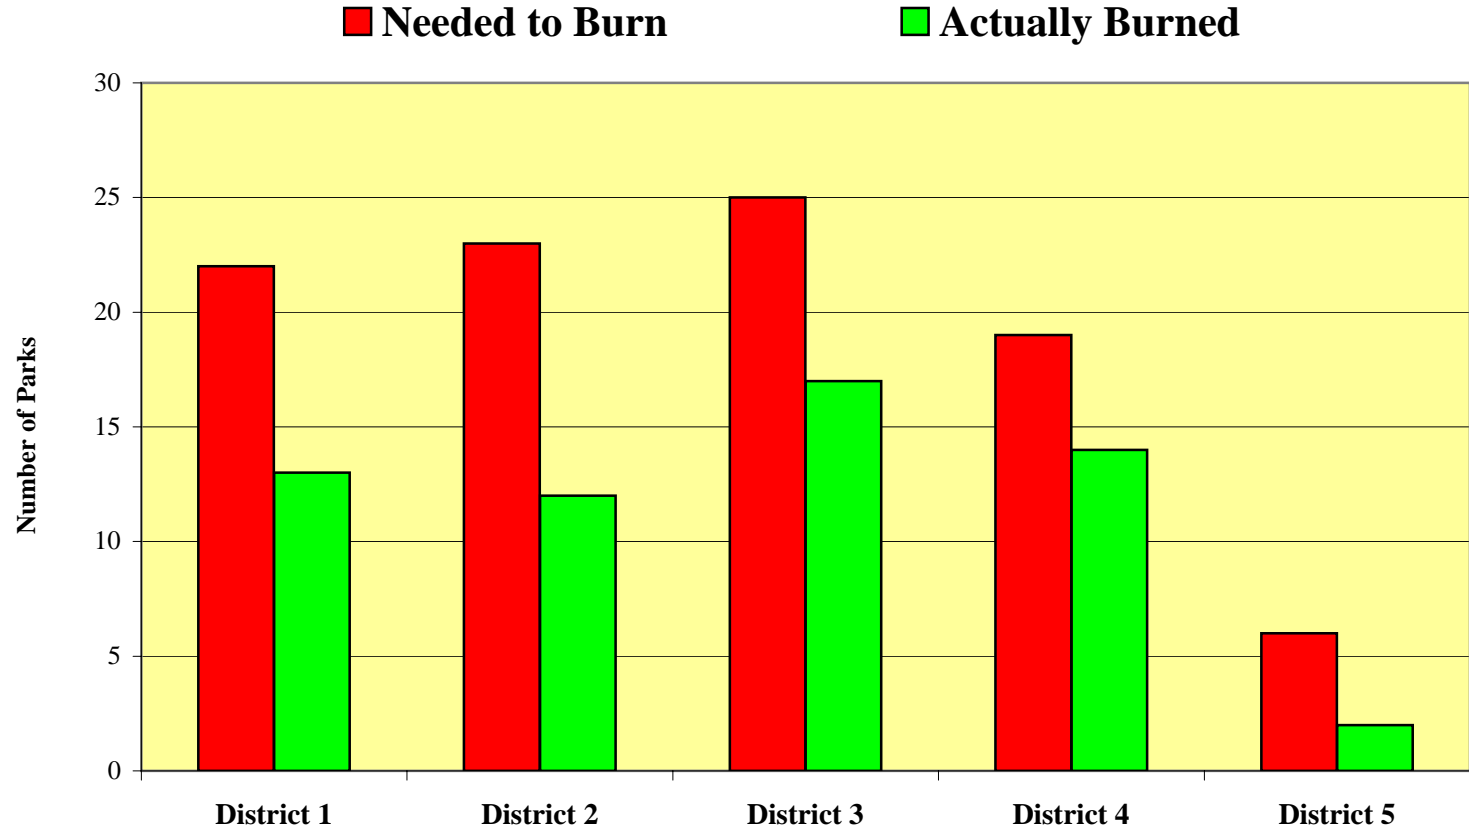

³ 34 wildfires totaling 30,887 acres occurred FY 00-01.

⁴ Most acres of *prescribed* fire ever recorded in the history of the FPS burn program (58,259).

⁵ Buffer Preserves were added to FPS, greatly increasing the number of fire-type acres; also, "acres planned" was redefined to reflect "ecological need" and includes all acres outside of their maximum fire-return interval and all backlogged acres.

Prescribed Burns Conducted FY 2005-2006

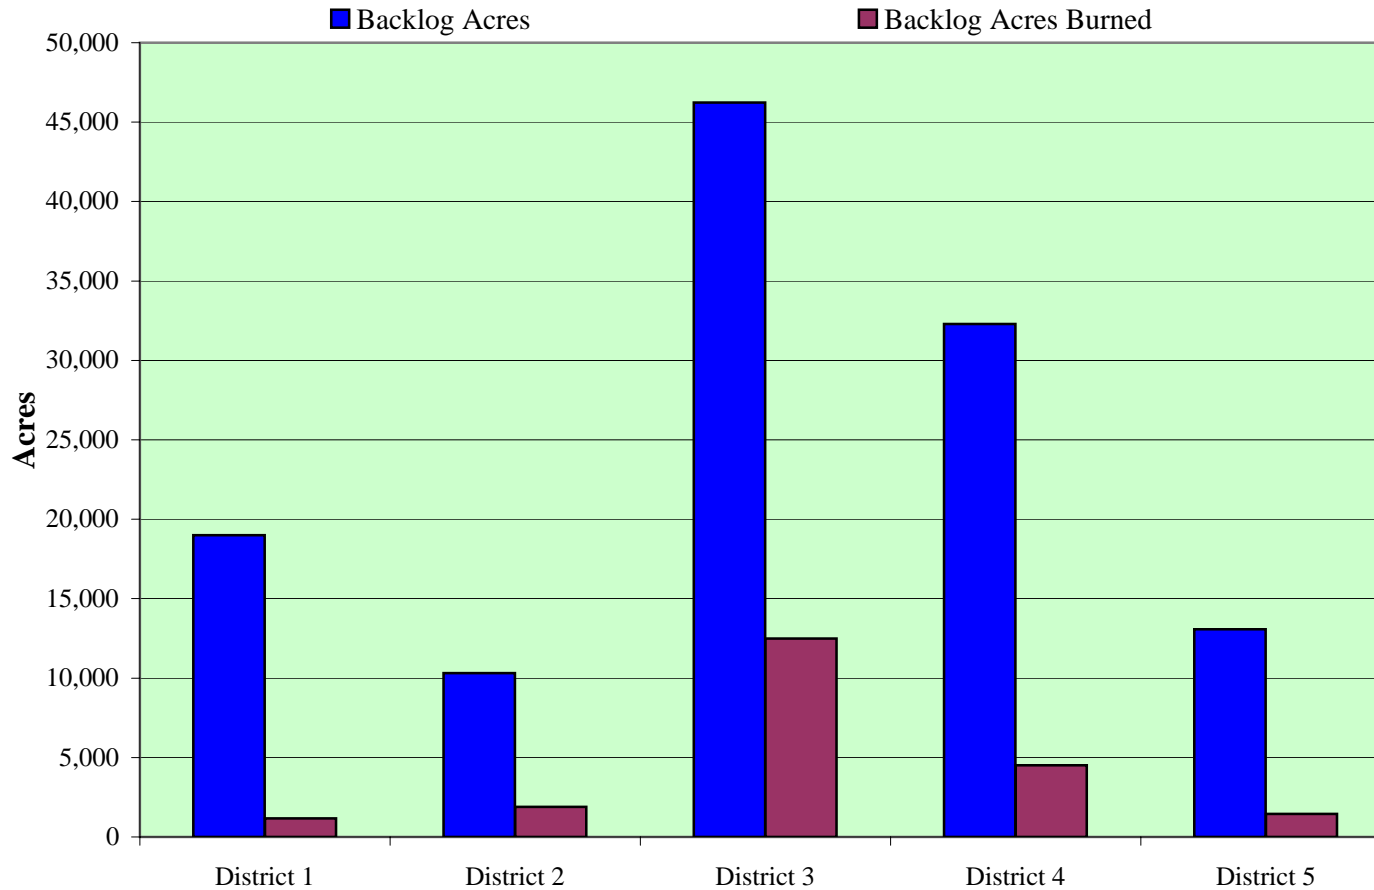

Number of Parks That ...

Parks that needed to burn are defined as those with a stated ecological objective. Parks that burned are those that conducted at least one prescribed burn during the fiscal year.

FPS Summary of Backlog Acres Burned FY 2005-2006

Fiscal Year 05-06 represented the FPS's second year of using an "ecological objective" to quantify annual prescribed burning needs. The ecological objective includes backlog acres plus fire-type acres needing fire to maintain established inter-fire intervals. Quantifying and measuring the backlog acres provides a more realistic measure of the burning needs that is directly comparable throughout the state. Statewide, the burn backlog was reduced by 18%.

Column Explanations

- (1) Fire-Type Acres - Total acres of natural community dependent on periodic fire plus acres of disturbed lands (e.g., pine plantations, pastures) regularly burned for other land management purposes. Include maintenance condition acres and Backlog Acres where restoration is planned, feasible, or desirable.
- (2) Backlog Acres - Overgrown and developing highly hazardous fuel levels. Total Fire-Type Acres that have not been burned within established burn zone interfire intervals. For zones comprised of natural communities, assigned intervals should be based on accepted ecological standards for relevant communities (taking local variation into account) and/or restoration and rare species needs.
- (3) Ecological Objective - Total acres ideally burned this fiscal year to maintain or begin restoring ecological health of all Fire-Type Acres. Includes total Backlog Acres plus total Fire-Type Acres needing fire this year to maintain established burn zone interfire intervals. Does not consider park ability to accomplish objective.
- (4) Acres Burned - Total acres burned under any circumstance. The majority will be acres burned in a manner that meets resource management objectives as stated in the Burn Plan/Prescription. Also includes acres burned out-of-prescription, or due to arson or lightning. Does not include restarts. (i.e., no "double counting.")
- (5) Total Number of Burns - Total number of prescribed burns during the fiscal year. Does not include unplanned ignitions (wildfires, arson fires, restarts, etc.).
- (6) Backlog Acres Burned - Total Backlog Acres burned during the fiscal year. Includes both prescribed fire and wildfire within backlog zones.
- (7) % Backlog Removed - $(\text{Total Backlog Acres} / \text{Backlog acres burned}) \times 100$. Represents the portion of all Backlog Acres burned during the fiscal year.
- (8) % Ecological Objective Met- $(\text{Ecological Objective} / \text{Acres Burned}) \times 100$. Represents the portion of actual ecological need for fire that was achieved during the fiscal year.
- (9) Acres Mechanically Treated - Total Fire-Type Acres mechanically treated (mowing, roller-chopping, etc.) for fuel hazard reduction prior to conducting prescribed burns. Does not include fireline construction or maintenance.

Totals	111	*	*	4,953

*173 species removed statewide

Eight-Year Summary	
Year	Acres
1998-99	2,986
1999-00	4,195
2000-01	3,020
2001-02	4,390
2002-03	5,789
2003-04	8,953
2004-05	5,150
2005-06	4,953
Total	39,436

Since Fiscal Year 1999-2000, Brazilian pepper, air-potato, cogon grass and Australian pine have been the four most frequently removed species. This year for the first time, more parks reported removing Chinese tallow than Australian pine. Brazilian pepper, however, remains the most frequently treated species by far. This year also marked the unusual report of pepper removal from Ft. Clinch in NE Florida. Interestingly, five of the top 10 species were removed from *all five* districts.

Species Most Commonly Removed

Species	# of Parks Removing	District Distribution
Brazilian Pepper	58	2, 3, 4, 5
Air-potato	41	all
Cogon grass	34	all
Chinese Tallow Tree	30	all
Caesar's Weed	30	2, 3, 4, 5
Mimosa	30	1, 2, 3, 4
Chinaberry	30	all
Australian Pine	29	3, 4, 5
Carrotwood	22	4, 5
Lantana	22	all
Japanese Climbing Fern	22	1, 2, 4
