

## DENTAL AMALGAM RECYCLERS LIST

Solely as a service to the public and businesses, the Florida Department of Environmental Protection (DEP) maintains the following list of companies that have been reviewed by the DEP. These dental amalgam recycling facilities separate the metal-containing components from the organic material so the mercury and silver can be reclaimed. Metals reclamation facilities reclaim commercial grade mercury and silver from dental amalgam. The information was obtained from the DEP's permitting files, other states' environmental agencies, or voluntarily supplied by the companies and is not necessarily a complete list of available services. A company's absence from the list does not imply prejudice or impropriety. The DEP does not endorse specific equipment or companies. The DEP, by providing this list, does not imply that the companies are in compliance with applicable laws. Users of this list are responsible for ensuring that products, equipment, or services comply with the requirements of local, state, and federal law. The DEP cautions users to personally evaluate the services and compliance status of any company they use. The list is updated periodically and subject to change without notice. The DEP welcomes information from other companies who wish to have their services or stewardship programs listed.
