Re: ConCover and ConCover 180 Products
Initial Cover for Landfills

Dear Mr. Clancy:

The Solid Waste Section of the Department has reviewed the information you submitted on June 3, for the subject products. This information has also been reviewed by our District offices. Based on your submittals, the Department has no objection to field testing these products as initial cover at Florida landfills. This approval does not apply to the use of your products as intermediate and final cover. Final approval for use of your products at a specific landfill will be left to the discretion of the District offices. A listing of these offices is attached for your information.

The District solid waste permitting engineers may require additional information prior to allowing testing or use of your products at landfills in their district. This may include field studies to demonstrate the products can perform adequately as an initial cover. Permit modifications may also be required before final approvals for use can be given. For further details, applicants interested in using your products should contact the district office in which their landfill is located.

If you have any questions, please feel free to contact Richard Tedder at 904/488-0300.

Sincerely,

Mary Jean Yon, Administrator
Solid Waste Section
