Re: Space Saver CSE-100
Initial Cover for Landfills

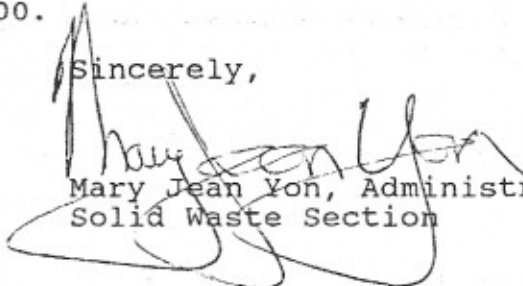

Dear Mr. Norris:

The Solid Waste Section of the Department has reviewed the information you submitted on November 9, for the subject product. This information has also been reviewed by the Central District office. Based on your submittal, the Department has no objection to field testing this product as initial cover at Florida landfills. This approval does not apply to the use of your product as intermediate and final cover. Final approval for use of your product at a specific landfill will be left to the discretion of the District offices. A listing of these offices is attached for your information.

The District solid waste permitting engineers may require additional information prior to allowing testing or use of your product at landfills in their district. This may include field studies to demonstrate the product can perform adequately as an initial cover. Permit modifications may also be required before final approvals for use can be given. For further details, applicants interested in using your product should contact the district office in which their landfill is located.

If you have any questions, please feel free to contact Richard Tedder at 904/488-0300.

Sincerely,

Mary Jean Von, Administrator
Solid Waste Section
